SUMMARY

I am a Computer Science Engineering Graduate with strong problem-solving skills and a growing interest in data engineering. I enjoy working with data-driven technologies and exploring tools like Power BI and Microsoft Azure to transform raw data into meaningful insights. With excellent time management and a passion for continuous learning, I strive to enhance my technical skills and contribute effectively to the evolving field of data engineering and analytics.

EXPERIENCE

INTERNSHIP

- **Frontend Web Development Internship:** Gained hands-on experience in developing responsive and user-friendly web interfaces. Contributed to designing, coding, and optimizing front-end components using HTML, CSS, JavaScript, and modern frameworks, enhancing user experience and interface aesthetics.
- **Java Development Internship:** Developed and maintained backend services, working extensively with core Java for application logic, debugging, and optimization. Assisted in building efficient, scalable solutions and integrating Java applications, improving backend functionality and performance.

PROJECTS

A Comparative Study of Bitcoin Price Prediction using Various Deep Learning Models:

Developed a Bitcoin Price Prediction to assist various deep learning models in forecasting Bitcoin prices. The research evaluates models such as Long Short-Term Memory (LSTM), Gated Recurrent Units (GRU), Convolutional Neural Networks (CNNs), and hybrid models to determine their effectiveness in predicting Bitcoin price movements.

Symptoms-Based Disease Prediction:

Developed a Symptoms-Based Disease Prediction web-based platform to assist patients in predicting potential diseases based on their symptoms and connecting them with doctors for further consultation. Created using HTML, CSS, JavaScript, Python, JQuery, Django, PostgreSQL, and PgAdmin. The website streamlined disease prediction and patient-doctor interactions, creating a practical health care solution.

QR-Code Generator:

Developed a versatile QR-Code Generator application that enables users to create customized QR codes with text input and download them as PNG files. Built with HTML, CSS, and JavaScript, the app features a streamlined, easy-to-use interface, providing a quick and efficient way to generate and save QR codes.

EDUCATION

B.Tech. in Computer Science & Engineering JIS College of Engineering	CGPA: 8.56	10/2021 - 06/2024
Diploma in Computer Science & Technology The Calcutta Technical School	CGPA: 7.9	08/2018 - 09/2021
Higher Secondary Prafullanagar Vidyamandir	81.60%	2016-2017
Secondary MNC Nababharati Sikshaniketan High School	65.28%	2014- 2015

ADDITIONAL INFORMATION

- **Technical Skills:** JAVA, Python, SQL, HTML, CSS, JavaScript, DBMS, Power BI, Azure, Object Oriented Programming, Computer Network, MS Word, MS PowerPoint.
- **Languages:** English, Bengali, Hindi
- **INTERESTS:** Passionate about traveling to explore new cultures and places, love for music as a source of relaxation and inspiration.
